Develop The Web Application Using Node-RED

Aim: Develop the web application using Node-RED Steps Followed:

• Opened a Node-RED project

• Added code to get child location in python

```
import json
import wiotp.sdk.device
import time
myConfig = {
    "identity": {
   "orgId": "hj5fmy",
   "typeId": "NodeMCU",
   "deviceId": "12345"
    "auth": {
         "token": "12345678"
client = wiotp.sdk.device.DeviceClient(config=myConfig, logHandlers=None)
client.connect()
While True:
        name= "Smartbridge"
         #in area location
        latitude= 17.4225176
        longitude= 78.5458842
         #out area location
         #latitude= 17.4219272
         #longitude= 78.5488783
        myData={'name': name, 'lat':latitude, 'lon':longitude}
         client.publishEvent(eventId="status", msgFormat="json", data=myData, qos=0, onPublish=None)
         print("Data published to IBM IoT platfrom: ",myData)
         time.sleep(5)
client.disconnect()
```

• Editing the HTTP Request URL

Located the child

Python script sending requests to IBM Cloud

```
Editor - C:\Users\HP\Desktop\child.py
                                                                                         child.py 🖸
                                                                                          Console 2/A 🖸
                                                                                             Data published to IBM IoT platfrom:
△ 1 import json
                                                                                             Data published to IBM IoT platfrom:
